WHO WE ARE

***We're Envisolve- not just consultants,
but custodians of the environment.***

We're a team of thinkers, doers, and dreamers who believe that progress should never come at the planet's expense. From the heart of Indore, we've been helping industries grow without leaving behind scars on nature.

Our work is backed by India's Quality Council (QCI/NABET), and our labs are MoEF&CC, NABL, and ISO certified. But more than credentials, we carry a deep sense of responsibility — toward the earth, its people, and the generations to come.

The People Behind Envisolve. We're not just consultants

— we're scientists, civil engineers, chemists, GIS experts, and EHS auditors who believe in the power of purpose.

We collaborate with research institutes and policy experts, and we stay ahead of every new guideline and law, so you don't have to.

WHAT DRIVES US?

Every tree cut, every drop of water wasted, every unchecked emission — it matters.

We're here to balance business with biodiversity, and growth with responsibility.

With a team full of young engineers, scientists, geologists, and environmentalists, we don't just tick boxes — we create real, measurable impact.

OUR SOLUTIONS

Each service we offer is a step toward a cleaner, more conscious future:

Environmental Clearance (EC)

Getting EC can be a tangled maze — we simplify it. From paperwork to presentations, we get you the green signal, legally and ethically. Clarity. Compliance. Confidence.

CTE/CTO (SPCB Approvals & Renewals)

Whether you're just starting out or scaling up, we handle your Consent to Establish or Operate with SPCB — so you can stay focused on building better. We deal with the pollution board, so you don't have to.

Extended Producer Responsibility (EPR)

Boost your brand's sustainability, avoid penalties, and contribute to a cleaner environment—while we handle your EPR compliance seamlessly.

EIA (Environmental Impact Assessment)

An EIA isn't just a report. It's a responsibility. We dive deep, assess the risks, and show you how to move forward — without harming what matters. Not just data. Real impact, measured and managed.

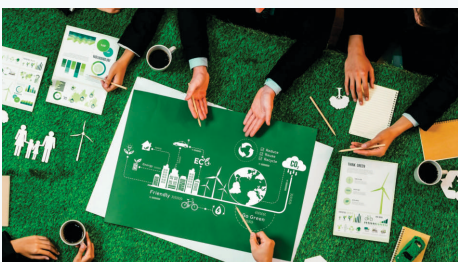

Environmental Audits (EA)

Audits aren't a headache when done right. We help you stay ahead of laws, so your business remains clean, compliant, and credible. Protect your brand. Preserve the planet.

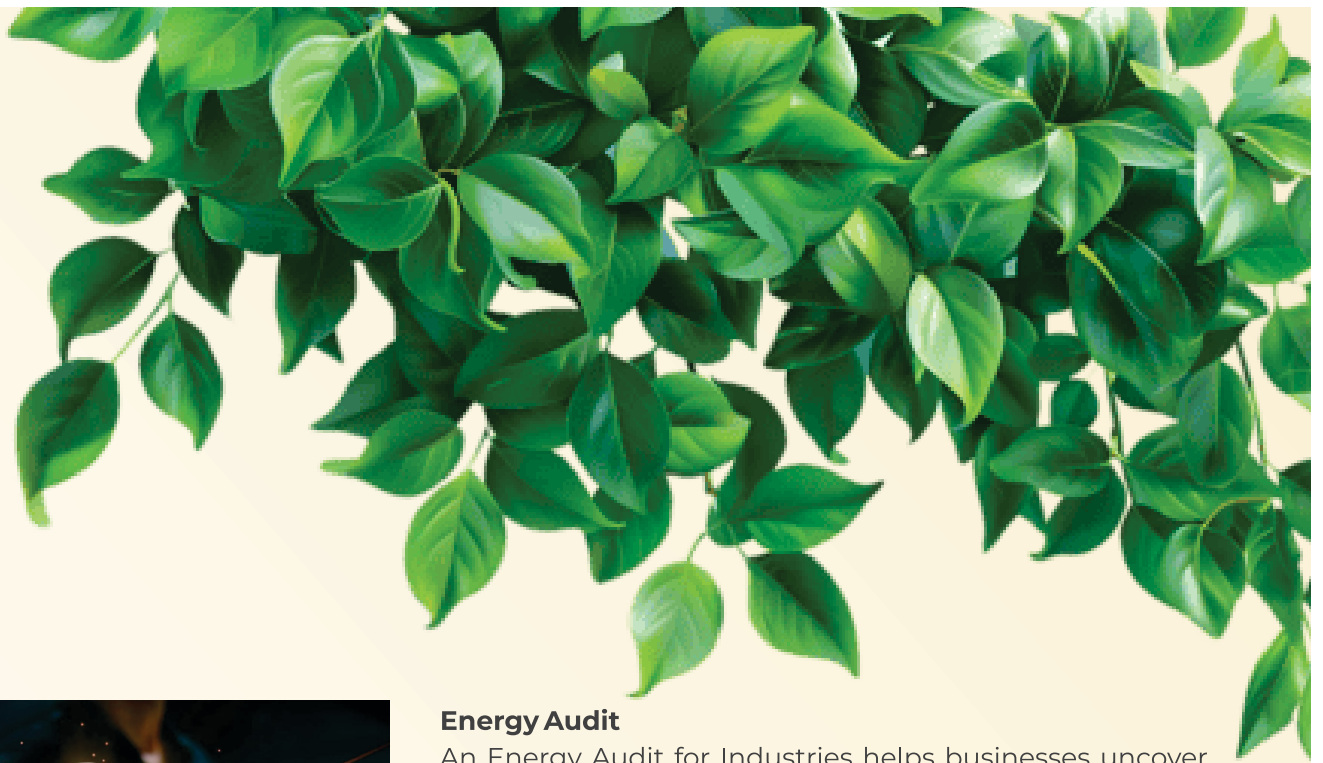

CGWA/CGWB Approvals

Water is sacred. We help you use it wisely — and legally. From Central Ground Water Authority permissions to full compliance reports, we do it all. Because every drop counts.

Environmental Compliance

We ensure full compliance with environmental regulations by minimizing impact, reducing waste, and promoting sustainable practices.

Energy Audit

An Energy Audit for Industries helps businesses uncover hidden energy losses, reduce operating costs, and improve overall efficiency. Our expert analysis identifies high-consumption areas and provides practical, cost-effective solutions to optimize performance. Boost productivity, enhance sustainability, and cut energy bills with a professional energy audit tailored to your industry.

Water Audit

A Water Audit for CGWA NOC ensures your industry meets Central Ground Water Authority (CGWA) compliance requirements with accuracy and confidence. We assess water usage, identify inefficiencies, and prepare detailed documentation to support smooth NOC approvals and renewals. Optimize water management, reduce wastage, and stay fully compliant with regulatory norms through our expert audit services.

Airport NOC

The Airport NOC (NOCAS) from Airports Authority of India (AAI) is a mandatory approval for construction near airports, ensuring compliance with height and safety regulations.

It safeguards air navigation by regulating building heights as per Civil Aviation norms.

With a streamlined online process, AAI ensures quick, transparent, and hassle-free approvals for developers and infrastructure projects.

Secure your Airport NOC today to build confidently and compliantly near airport zones.

ENVISOLVE LLP QUALITY POLICY

Envisolve LLP will endeavour to become a pioneer environment consultancy organization in the field of EIA/EMP and carrying out other Environmental Monitoring/Analysis and projects in truly professional, systematic and accurate manner.

We shall achieve this through customer satisfaction, dedicated professional experts in-house and empanelled and State of the Art infrastructure, technical support, work environment, continuous & continual improvement by implementation of ISO 9001 standard framework for Quality Management System. This Quality policy will be of dynamic nature and will be reviewed from time to time by owners and management team during review meetings depending upon legislative, statutory and customer related requirements and accordingly objectives will be set for the organization.

We shall ensure that this Quality Policy is communicated to all the stakeholders internally and external and also available to and understood by all personnel of ENVISOLVE LLP Environment and other division and thoroughly followed and understood by them. This policy will be displayed at relevant places in the organization.

WHY PEOPLE TRUST US

- Transparent communication
- Government-approved credibility
- Timely delivery with zero shortcuts
- Solutions built on science & sincerity
- We care. And it shows.

LET'S BUILD SOMETHING THAT LASTS

Whether you're a factory owner, an infrastructure developer, or just someone who cares about doing things the right way — we're here to support you. Indore, M.P.
